

Your patient is applying to the U.S. Department of Veteran Affairs (VA) for disability benefits. VA will consider the information you provide on this questionnaire as part of their evaluation in processing the Veteran's claim.

Note: The General Medical DBQ is a screening examination for all body systems and is not meant to elicit the detailed information about specific conditions that is necessary for rating purposes. Therefore, all claimed conditions, and any found or suspected conditions that were not claimed, should be addressed by referring to and following all appropriate Questionnaires to assure that the examination for each condition provides information adequate for rating purposes.

This purpose of this exam is to ensure that any conditions that might not be specifically addressed on the original exam request are identified for possible entitlement to benefits.
